

THE VERB OF GOD

Verb: class of words which, from a semantic point of view, contain the concepts of action, process or state and, from a syntactic point of view, fulfil the function of the nucleus of the predicate of sentences; word, speech; other similar words... term, diction, concept, voice.

Much more than a Sound or the Voice of God, the verb manifests God's Thought as CREATIVE ENERGY ITSELF.

I AM AS GOD CREATED ME.

If we hadn't invented a private, unreal world to separate ourselves from God, there would be no sign of fear. It was our choice to keep this little misunderstanding alive for all eternity. And no matter how hard we try to "make it happen," our Identity will never truly be that. It remains preserved, completely untouched in the divine light. We are not separate beings. We are as He created us: His Extension. We are a Single Thought of His Mind. We are His Action in every sound, in every sentence spoken by every mouth, for as long as time endures.

When we recognise the truth, we recognise the Unchangeable. We recognise the Perfect Harmony of HOLY COMMUNICATION, as it is manifested in our Father's Will. This is why this lesson is called "the cradle of all miracles." It restores truth to consciousness and unleashes the Action and Power of Christ in every instant of forgetfulness.
